**HALL A 10306**

**Robkoo** is a musical software and hardware design team based out of Shanghai, China. With "digital art crafting, sharing and learning made easy" as our mission, the team aspires to empower everyone to create and enjoy music, regardless of background or skill. So we began by creating intuitive and fun apps and gadgets, graduating to launching Wind Synthesizer R1 as our first instrument in 2021. Then we launched two products, Qithesizer App and Clari mini in 2023.

Our team has about 15 years of Internet experience and has very senior practical experience in Internet product development and operation. And we focuses on the innovation and research & development of art technology products. For now our team has more than 70 intellectual property rights.

## Wind Synthesizer R1

is a wind synth & controller with responsive RGB lights. With its intuitive design, audio technology, and realistic sounds, R1 makes performing music easier than ever. This product has been sold in 26 countries around the world and has won many awards such as iF Design Award, MIDI Innovation Award, TEC Award nomination and so on.

## Qithesizer

Qithesizer is a powerful multi-engine hybrid software synthesizer. With its combination of virtual analog, wavetable and physical modeling, Qithesizer is designed to conjure up virtually any sound with finesse and ease.

New Release

## Clarii mini

is a new product presented by Robkoo in 2023 and won the the Recommended New Product of Music China. As a digital wind instrument offering a variety of realistic sounds and playful features in a slim and portable body, Clarii mini offers people a fun way to play tones by simply shaking and waving the instrument itself! Clarii mini is affordable and accessible to everyone.
